To Whom It May Concern:

Recently, The Warranty Group had the opportunity to review a new dealer management system on the market named VITAL, a Virtual Internet Total Automated Lending system. This dealer management system was created by Infinite Financial Group, Inc. under the direction of Jimmy Ward, President and CEO. Over the years, we have had many opportunities to review multiple dealer management systems in the market and we see VITAL as an excellent solution when considering dealer management systems.

We see the benefits of VITAL for its rapid loan origination capabilities, its automatic documentation feature, its intuitive management reporting functions, and its ability to help ensure that every avenue is pursued for a dealer to make a deal for a customer. Dealers will see the benefits of VITAL in helping to: (1) increase their dealership's efficiencies, (2) maximize their profits, and (3) control their dealership costs.

My organization, The Warranty Group, is excited to see this high quality solution for dealers enter the market.

Thank you,

Tom Scott

Executive Vice President National Accounts
